Product Description

Optimize Space and Efficiency

GOODSENSE walkie straddle stackers offer a safe, proactive and cost effective solution when you need to maximize your storage space and improve efficiency.

Exceptional practical use

Experience more efficiency and utility all-around with GOODSENSE straddle pallet stacker. Stacking capabilities save space and time. Load and unload trucks from the ground or use it as a portable work platform to simplify maintenance tasks.

When compared with counterbalance forklifts, GOODSENSE straddle pallet stackers allow you to stack more products in the same size room by narrowing the required aisle width, which translates into more usable space while optimizing selectivity.

GOODSENSE Straddle Stackers Offer a Clear View All Around

Operators using the walkie straddle stacker benefit from exceptional visibility, allowing them to quickly and confidently maneuver in tight spaces and position loads on the floor or while heightened.

The low-profile power unit and clear mast design provide excellent fork tip visibility on the ground and while working with heightened loads.

Take Control

You need exquisite control to meet the challenges of efficiently moving and storing product in limited space. The innovative controls and compact design of the straddle stacker enables operators to maneuver with ease.

The handle with its uniquely designed handgrip, raise / lower buttons, simplifies operation and enhances comfort. The brake override feature enables the lift truck to turn in areas almost as small as its own footprint while the handle remains within the geometry of the truck.

Operators can quickly and conveniently choose from two levels of programmable performance to match their own skill level or the particular application needs. Rabbit mode is fast speed, suitable for skilled operator. Tortoise mode is slow speed, suitable for a green hand.

Reliable, Lasting Value

GOODSENSE builds long-term value into all of its lift trucks and the walkie straddle stacker is no exception.

Durability is obvious inside and out. The chassis, mast and cantilever beam feature liberal amounts of steel for long life and a steel power unit cover to protect internal components. The control handle is made of high-grade aluminum and benefits from structural webbing for maximum strength and durability.

Long-term performance advantages are further extended with GOODSENSE's integrated approach to maintenance. Internal components can be accessed quickly and easily. In addition, GOODSENSE's innovative system simplifies trouble-shooting for service technicians.
